

Rules-based expert system (AI) for agile enterprise management

Management innovation: AI to lead businesses

Software businesses

- Want to enhance their product portfolio by new, AI based solutions (Example: ERP > ?)
- Want to replace/enhance present solutions with AI (Example: Business Planning)

Business consultants

- Clients request results, not advice.
- Want to upgrade consulting*s traditional business model to AI supported consulting.

Business managers

- Struggle to cope with accelerated change (Example: VW)
- Find traditional KPI based management insufficient (See KOTTER, “Accelerate”)
- See AI based tools for managing the entire business

Rules-based expert system delta-t COCKPIT

Benefits for software businesses

- New AI based business software product
- Advisor for business management teams
- One single solution to set goals, plan, lead execution and learn-as-you-go.
- Ready to go. No product development required.

Benefits for business consultants

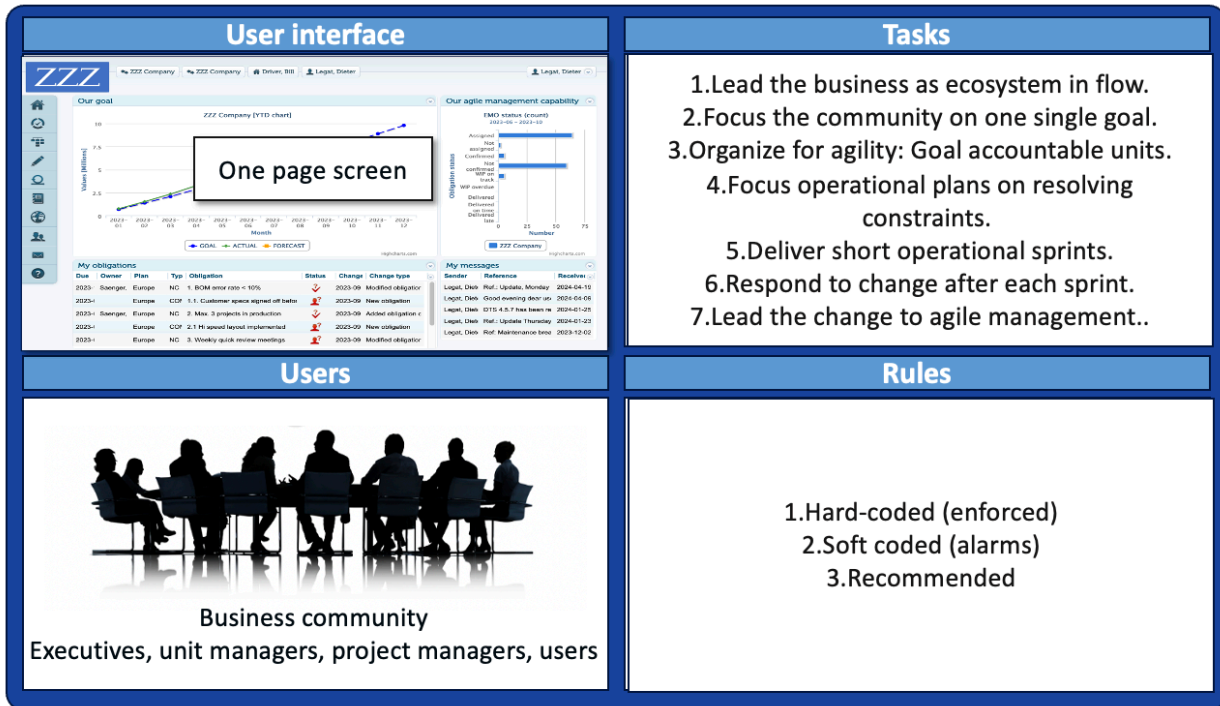

- Consultant + delta-t COCKPIT => AI supported business consulting.
