

FATEDODGING.

The focus is on prejudice-driven fate as a result of conspirational, manipulative, hostile, deliberate, systematic, longterm & possibly lethal intentions, framings & actions taken by worldly authorities or institutions versus an affected minority or individual.

In this sense fate (as opposed to a natural disaster) is a manmade iteration (thus a vulnerable & imperfect program).

FATEDODGING may be seen as a infiltrating, subversive method or a defying attitude, behaviour, resistance or counterstrategy solely serving the purpose of survival.
