ASBEST BIOGRAPHY

In 2018, noise rock band Asbest appeared out of nowhere with their debut album «Driven», which received highly positive reviews internationally (Visions: 9/12, «A combination of Metz's or Pissed Jeans's rawness with openness for experiments like A Place To Bury Strangers, underscored by shoegaze elements»). The blog bprodukt wrote: «Never before have cold post-punk, passionate noise rock and hypnotic shoegaze been combined so naturally».

Connected to the LGBTQIA+ movement (people discriminated against by the patriarchy due to their sexual orientation or gender identity), Asbest use their follow-up album «Cyanide» to condemn the compulsions of modern society: pressure to succeed, self-optimisation, self-exploitation. They explore the question: Is it possible to lead a truly happy existence within a diseased reality without denying oneself or the circumstances? To quote Adorno: Is there a right life in the wrong one?
