

cost and project management

due to the fact that the realization of your projects may vary of initial costs and demands, i created schematic overviews as guides for mutual understanding. have a closer look!

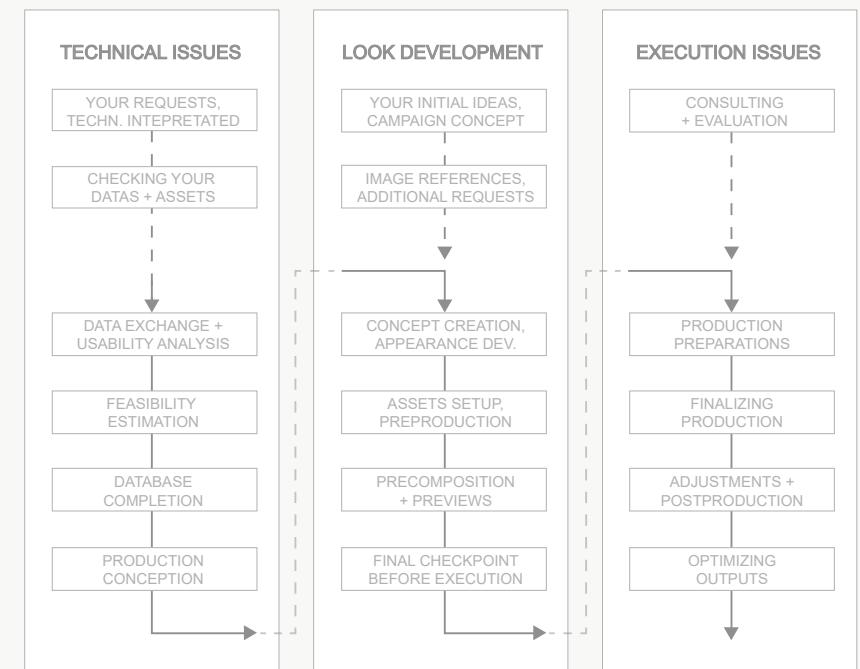

transparent cost evaluation

i inform you about your investments

- TREATING REQUESTS:
- a common briefing is needed to understand all your needs and requests.
 - by analysing your datas i can estimate all incoming preparations to do.
 - defining a general publication concept showcases additional costs + time.
 - considering a budget for the whole production reframes your investments.

- COMPOSING OFFERS:
- my offers are based on **3 issues**: technical / look development / execution
 - costs can vary, if during the work additional unregistered demands occur, in such cases i renegotiate the budgeting-plan of the production with you.
 - during execution i inform you early, if processes reach their offered limits.
 - offers are calculated excl.VAT and may be extended individually.

OUR CALCULATIONS:

CONFIDENTIAL WORKFLOW: COMPLETE DATA ANALYSIS AND NDA's

to evaluate your requests i will ask for datas to analyse what i need to solve and how i will use them. i treat all sent files very confidential and don't share them once estimations are solved nor when the project is finished and achieved.

flexible adjustments of costs

i optimize the feasibility of your projects

MY COUNSEL:

- by comparing generic and custom-made treatments, i can adapt the initial development and propose you efficient solutions to get your results in-budget.
- by nature, i make a **pitch estimation** of outcomes and a **plan of execution** i share with you. extra costs only occur if you decide to extend initial requests.
- i communicate proposed options transparently according to price and time expansions, so you are always aware of all additional costs arranged together.

YOUR GAIN:

- get constructive advices before beginning with your project and it's production.
- adjusting requests and expectations in order to get optimized results for you.
- aligning the initial concept equally with the budget-plan and the feasibilities.
- controlled costs-feedbacks during the steps of each production phase.

OUR PROCEDURE:
